

## Wood Awards Celebrate Projects at the Forefront of Architecture and Design

### 2016 Wood Design & Building Award Winners Announced

Ottawa, ON, January 10, 2017 – The [Wood Design & Building](#) magazine announced the award recipients for the esteemed 2016 Wood Design Awards program. Winning projects were hand selected from approximately 200 submissions by a prestigious architectural jury consisting of:

- **Peter Bohlin**, Principal at Bohlin Cywinski Jackson
- **Patricia Patkau**, Principal at Patkau Architects
- **Brian Court**, Partner at The Miller Hull Partnership

Special awards were granted by the Canadian Wood Council as well as this year's sponsors, Sustainable Forestry Initiative, Western Red Cedar, and Sansin. Submissions to this year's awards program inspired the conventional way of thinking about wood in construction – and reminded us of the possibilities for broader applications of wood in future buildings. International and North American submissions echoed one common theme of pushing the boundaries of what is considered excellence in architecture and design.

“For architecture to truly be successful, it must transcend buildings and fulfil the structural, functional and aesthetic needs of a community.” explained Etienne Lalonde, Vice-President of Market Development for the Canadian Wood Council. “The Wood Design Awards program is an opportunity for design teams to showcase applications of wood/wood products that ultimately lead to safe, strong and sophisticated buildings and that inspire others to use wood in construction.”

The *Wood Design & Building* magazine, in partnership with the Canadian Wood Council, extends its appreciation to everyone who participated in the 2016 Awards program, and congratulates all of the award recipients featured below. A special thank you is also extended to this year's sponsors for their support.

### The Award Recipients for the 2016 Wood Design & Building Awards program
