2013 Catherine Lalonde Memorial Scholarships for Wood Related Research

The Catherine Lalonde Memorial Award is presented to graduate students who demonstrate excellence in their studies of structural wood or wood design. The Canadian Wood Council (CWC) invites submissions from graduate students in engineering, architecture, wood science and forestry. Research projects must demonstrate direct benefit for structural products manufactured by the Canadian forest products industry.

Catherine, a professional engineer, was a passionate representative of our industry who relentlessly championed the use of wood in residential and commercial construction. She was president of the CWC from 2000 to 2003, when sadly she lost her battle with cancer. This award was created to honour Catherine's memory and to perpetuate the legacy she left to the Canadian forest products industry through her 10 years of work at CWC.

This year marks the ten-year anniversary of Catherine's death. To commemorate this anniversary, CWC will be granting two scholarships. One scholarship will recognize excellence in architectural wood design while the other scholarship will recognize excellence in engineering.

Scholarships value: 2 scholarships at \$2500 each
