Celebrating Achievements in Wood Architecture and Design
2013 Award Winners Announced

Ottawa, ON, December 19, 2013 – The Wood Design & Building magazine is pleased to announce the award recipients for the prestigious 2013 Wood Design Awards Program. Sixteen projects were hand selected from over 125 entries by an esteemed architectural jury consisting of: Michael Malinowski from Applied Architecture Inc., Michael Heeney from Bing Thom Architects, and Steven Raike from Lake|Flato Architects.

A nod to the calibre of entries this year, the Ron Thom special award was presented to Bohlin Cywinski Jackson for their project entitled Tsing Tao Pearl Hill Visitor Center. A renowned Canadian architect, Ron Thom’s designs are celebrated throughout Canada. The Ron Thom award honors his commitment to architectural excellence by acknowledging a project that exceeds all other project designs and executions. Special awards were also granted by the Canadian Wood Council as well as this year’s award sponsor, Sustainable Forestry Initiative.

“The projects submitted for the 2013 awards program pushed the boundaries of conventional wood buildings and made it challenging for the jury to narrow the selection.” explained Etienne Lalonde, Vice-President of Market Development for the Canadian Wood Council. “The Wood Design Awards is an opportunity to showcase excellence in wood architecture and acknowledge a wide-range of wood product applications that demonstrate an understanding of the special qualities of wood such as strength, durability, aesthetic appeal and cost-effectiveness.” added Theresa Rogers, Editor, Wood Design & Building magazine.

The Wood Design & Building magazine, in partnership with the Canadian Wood Council, would like to thank everyone who participated in the 2013 North American Awards Program, and congratulate all of the winning projects. A special thank you is also extended to this year’s sponsor, the Sustainable Forestry Initiative.
