CWC is pleased to announce that a vacant technical position in Codes and Engineering at the Council has been recently filled. Adam Robertson joined CWC in January 2011 to fill the position of Technical Services Specialist.

Adam Robertson completed his Bachelor of Applied Science in Civil Engineering at the University of Toronto. In Toronto, Adam worked for a year with Halsall Associates Ltd. doing the design of structural elements for various projects. Adam also worked for a year with FRAM Building Group as an Assistant Project Manager. In 2008, Adam moved to Vancouver to study for his Master of Applied Science with Dr. Frank Lam in the Department of Wood Science at the University of British Columbia. Adam's thesis research focused on the life-cycle environmental impacts and design implementation characteristics of CLT systems. Adam is currently in the final stages of his M.A.Sc. thesis requirements.

As Technical Services Specialist, Adam is involved in CWC's building code and standards initiatives, applied engineering problem-solving and the development of CWC's design tools and publications including the updating of CWC's Wood Design Manual and other CWC publications for the 2010 National Building Code of Canada cycle.
